

International Shipping

We get a lot of inquires about international shipping. Frequently we need to board a dog to satisfy vaccination protocols. We will board and train for \$30/day. The owner will be responsible for any vet, shipping and travel costs to get their dog to its final destination. We offer and prefer our custom courier service.

Shipping to an area that has rabies is usually pretty easy.

Shipping to an area that is rabies free normally requires waiting till a dog is 12 weeks to a vaccinate for rabies then drawing a titer and waiting for results. So we expect at least 4 weeks of boarding/training.

It requires quite a bit of time and research to find out specifics of shipping to your area so if you want a better estimate we request a \$200 research fee. If you decide to go get a puppy the research fee will be applied towards the purchase of your pup.
